1.0 GENERAL INFORMATION

The manual is intended for Taytay, Rizal Barangays, the Municipal Disaster Reduction and Management Office (MDRRMO), and the Command Center. The general information section of the user's manual describes the system's general terms and purpose.

1.1 System Overview

Taytay, a small city in Rizal, Philippines, with a population of 386,451, urgently needs an efficient disaster management system due to frequent emergencies and disasters. The Taytay Municipal Disaster Risk Reduction and Management Office (TMDRRMO), alongside the barangays, is responsible for protecting the welfare of its residents and managing a wide range of incidents, such as road traffic accidents, medical emergencies, and various types of fires.

The Taytay Resource, Assistance, and Community Coordination System (TRACCS) has been developed to address these challenges. TRACCS is a mobile and web-based platform that simplifies the reporting process and enhances coordination among Taytay's barangays, residents, and the local government unit (LGU). Utilizing geolocation, TRACCS allows users to report incidents with precise location data, enabling TMDRRMO and barangay officials to respond effectively and efficiently. The system provides an accessible, streamlined solution for emergency reporting and resource management, promoting better communication and collaboration between the residents and the local authorities.

1.2 Organizational Structure of the User Manual

This User Manual will be divided into four (4) main parts.

1. General Information – Describes the system in general terms and its purpose for what it intends to do.
2. System Summary—Provides an overview of the TRACCS applications. It summarizes and outlines the system's hardware and software requirements, application configuration, user access levels, and behavior in case of an issue.

3. Getting Started—This section explains in detail how to operate and manage TRACCS applications and install the other system components. It also previews the system menu and options.
4. Using the System – Provides a detailed description of the system's modules and functionalities.

2.0 SYSTEM SUMMARY

This section provides an overview of the entire system. The description includes the system's requirements, configuration, and multiple user access levels.

2.1 System Configuration

T.R.A.C.C.S is offered on two application platforms with varying user access levels. The Web program can be accessed with any computer web browser with an internet connection. The Mobile Application, however, is only compatible with Android operating systems. The Android Operating System requires at least version 8.0 Oreo or higher. The user's mobile device must have internet connectivity and a Global Positioning System (GPS) because it will have limited capabilities. If the application is offline, users can only reach the emergency hotlines for Taytay and Rizal MDRRMO organizations for the mobile application's offline user interface page.

2.2 User's Access Level

The MDRRMO Administrator is the super user with complete authority over the web application's administrator dashboard.

The Barangay Administrator is the admin user with access only to the Dashboard, Reports, Requests, and Resources modules on the Administrator dashboard.

Web users only see the web application's landing page, which includes public pages such as Home, About Us, Contact Us, donate, and Download.

The mobile application features two users: verified mobile users, who can access modules such as reports, incident updates, hotline, donations, and accounts, and unverified Mobile users, who can only see the hotline module.

3.0 GETTING STARTED

This section discusses installing and utilizing the system correctly and the other components required to run it.

3.1 Installations

T.R.A.C.C.S is available on two platforms, each with different user access levels. The web version can be accessed using any computer with an internet connection through a compatible web browser. It is accessible directly at this URL: <https://taytaytraccs.online>, by copying and pasting it into the address bar.

The mobile application is designed exclusively for Android devices and requires them to run on Android 8.0 Oreo or later. The mobile device must be connected to the internet and have GPS capabilities for optimal functionality, as certain features will be unavailable without these. If the mobile application is offline, the user can only access the emergency hotlines for Taytay and Rizal MDRRMO organizations through a limited offline interface.

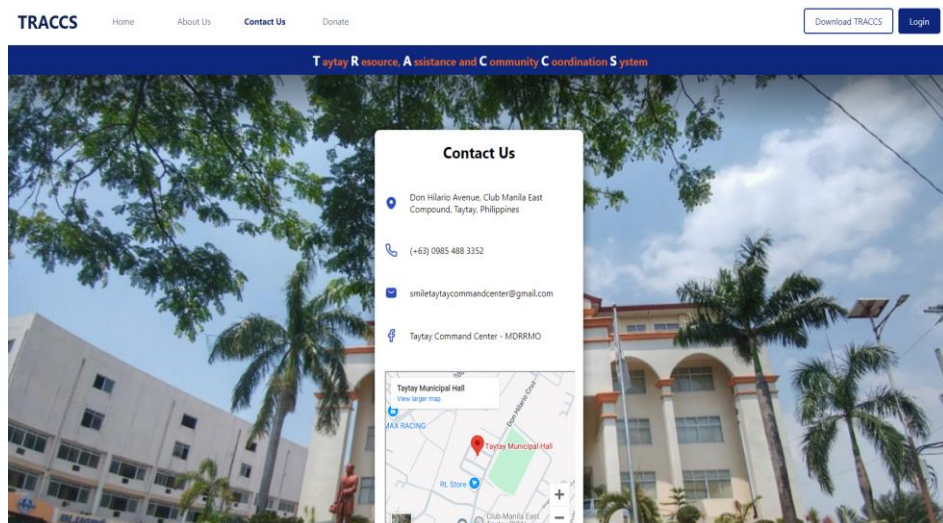

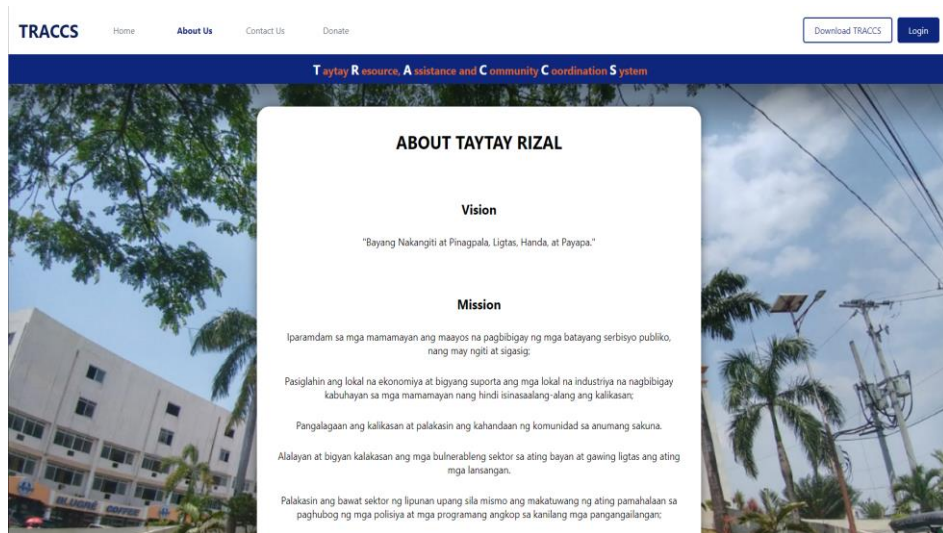

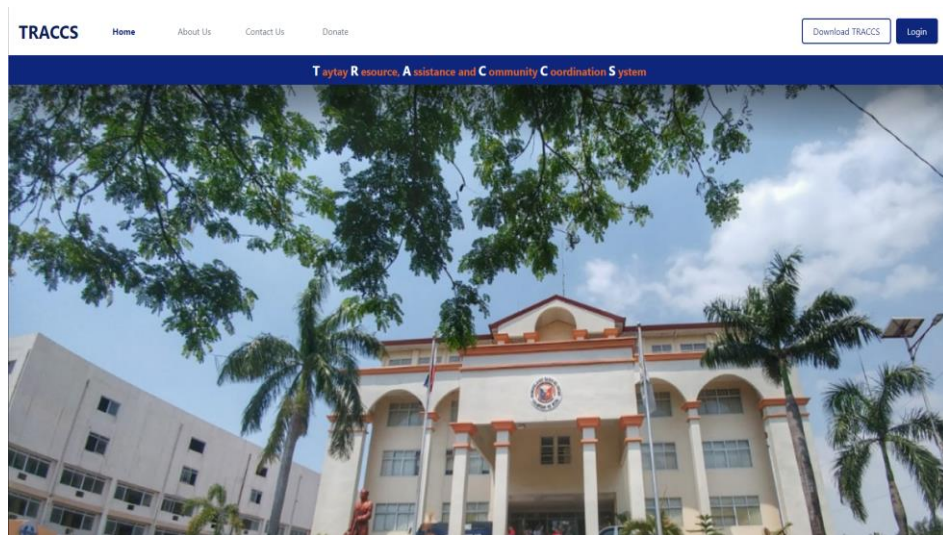

3.0 USING THE SYSTEM APPLICATION

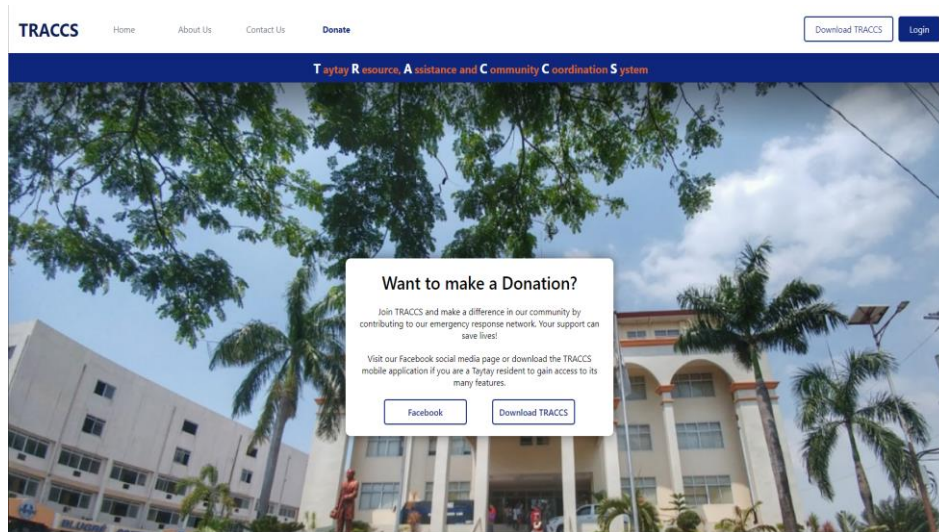

This part of the user's manual briefly explains how the user can operate the TRACCS system applications.

4.1 Web Application

The TRACCS web application is accessible through a computer with internet access and a web browser. To navigate the landing page, you can access it via the uniform resource loader domains available, which are <https://taytaytraccs.online> and <https://traccs-web-frontend-9ejy.onrender.com>, respectively.

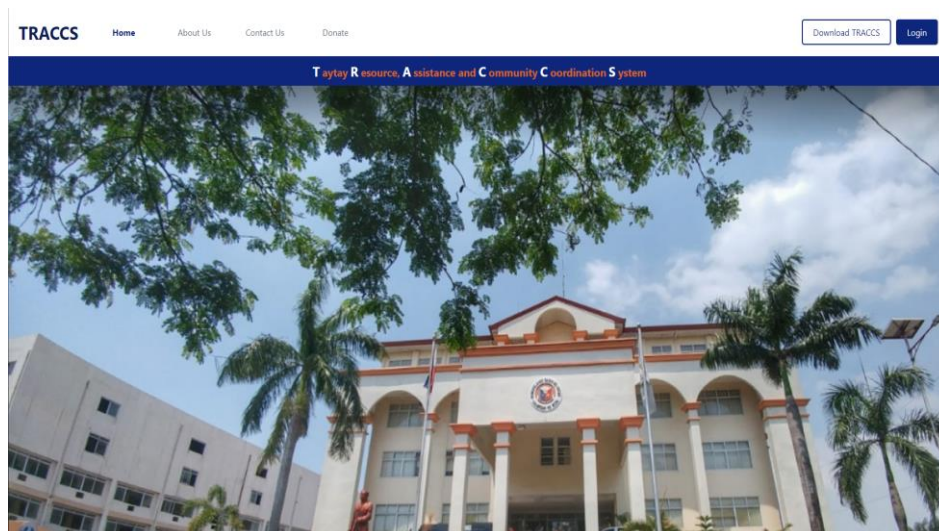

4.1.1 Landing Page

- A. Click the home menu for a quick overview of Taytay, Rizal.
- B. Click the About Us menu to view information about Taytay and Rizal's vision, mission, history, and location.
- C. Click the Contact Us menu to find available ways to contact and locate the Taytay, Rizal MDRRMO, and Command Center.
- D. Click the donate menu to see the available ways to donate to Taytay, Rizal.

4.1.2 Setup

A screenshot of a web form titled "Setup a Root Admin Account" centered on a dark blue background. The form is white and contains the following fields and text: "Email:" followed by a text input field; "Please use an email that can receive OTPs."; "Contact Number (+63):" followed by a text input field with a placeholder "+63 78xxxxxx"; "Must be a valid Philippine number starting with +639."; "Password:" followed by a text input field; "Password must be 8-20 characters, include uppercase, lowercase, number, and special character."; and a blue button labeled "Send OTP".

Setup – If the web application does not have an MDRRMO administrator yet, it would require the MDRRMO or Command Center to create an MDRRMO administrator root account first.

- A. Click the Login button on the landing page of the web application.
- B. Set up the Root Admin Account by inputting the required credentials to validate it.
- C. Wait for the email sent by tracss.noreply@gmail.com containing the one-time password for the account creation.
- D. Input the required one-time password and be navigated to the web application Login page.

4.1.3 Login

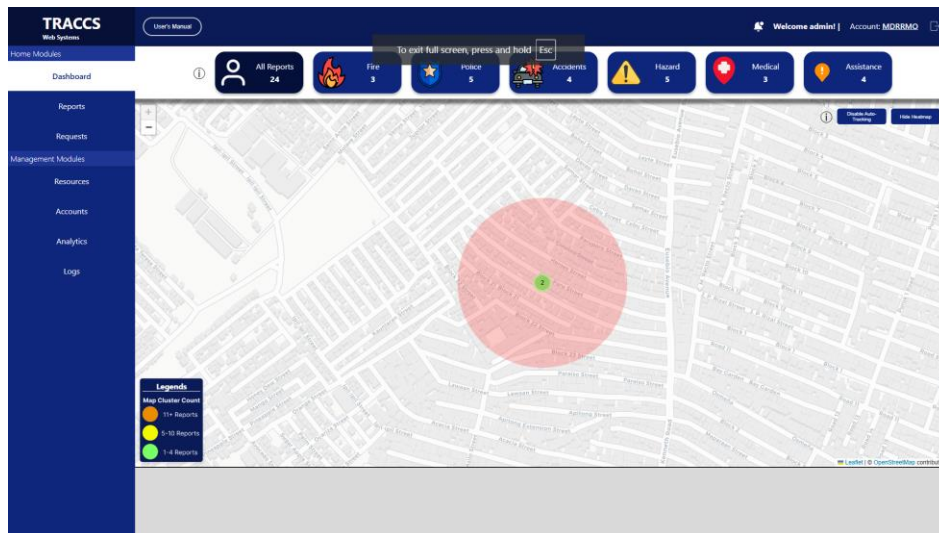

The top screenshot displays a 'Terms and Conditions' modal window. It contains three sections: '1. Introduction' (welcome message), '2. User Responsibilities' (usage guidelines), and '3. Account Security' (acknowledgment of terms). At the bottom, there is a checkbox for 'I agree to the terms and conditions' and buttons for 'Go to Home' and 'Proceed to Login'.

The bottom screenshot shows the main login interface. On the left, the 'TRACCS' logo is displayed with the subtitle 'Taytay Response, Assistance and Community Coordination System'. On the right, there are two logos at the top, followed by the text 'Sign in as an Administrator...'. Below this are input fields for 'Enter username' and 'Enter password', a 'Continue' button, a 'Forgot Password?' link, and a 'Go Back' link at the bottom right.

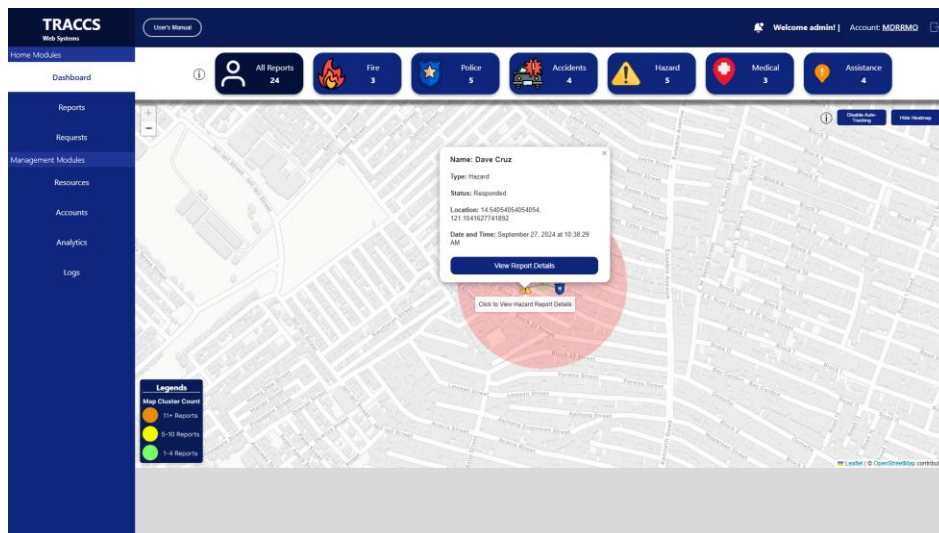

The admins can log in with their credentials to access the admin dashboard.

- A. The user must first agree to the Terms and Conditions.
- B. Input the valid email and password credentials for administrator accounts.
- C. Click the continue button and wait to log in to the web application.
- D. Click forget the password to open the forgotten password process

4.1.4 Dashboard

Dashboard – an interactive map that visually displays the location of incidents and reports across the area of operation. Above the map, you will find a series of widgets that summarize incident categories and their counts.

Report Details

Report ID: 66951aa53f1cd793359e4878	Report Type: Hazard	Responder: MDRRMO
Name: Dave Cruz	Contact no.: 09386914325	Email: hejehi6481@vineart.com
Report Date & Time: September 27, 2024 at 10:38:29 AM	Respond Date & Time: September 27, 2024 at 11:28:18 PM	
Status: Responded	Location: 14.54054054054054, 121.1041627741892	
Description: Hazard Type: Down Wires Additional Description:	Images:	

Deny **Done**

Provide a reason for denying the report

Enter deny description

Cancel **Submit Deny Reason**

- Click the “All Reports” icon to view the total reports and display all kinds of reports.
- Click individual icons in the incident summary widgets to display and view specific related reports on the map.
- Located on the left side of the map, users can zoom in or out using the plus (+) and minus (-) buttons.
- Located at the top right of the map, users can toggle “Enable Auto-Tracking,” which allows real-time tracking of incidents. Users can also toggle the heatmap's visibility, highlighting areas with high incident density.
- You can click the icon to view details such as the reporter's name, the type of report, the status, the location, and the date and time.
- You can “Respond” or “Deny” by clicking the buttons

- G. Clicking the “Respond” button will update the report's status and turn it into a “Done” button.
- H. If you click the “Deny” button, a modal window will appear requesting that you input the reason for the denial.
- I. After the report is denied or completed, it will be stored in the “History.”

Add to History Map

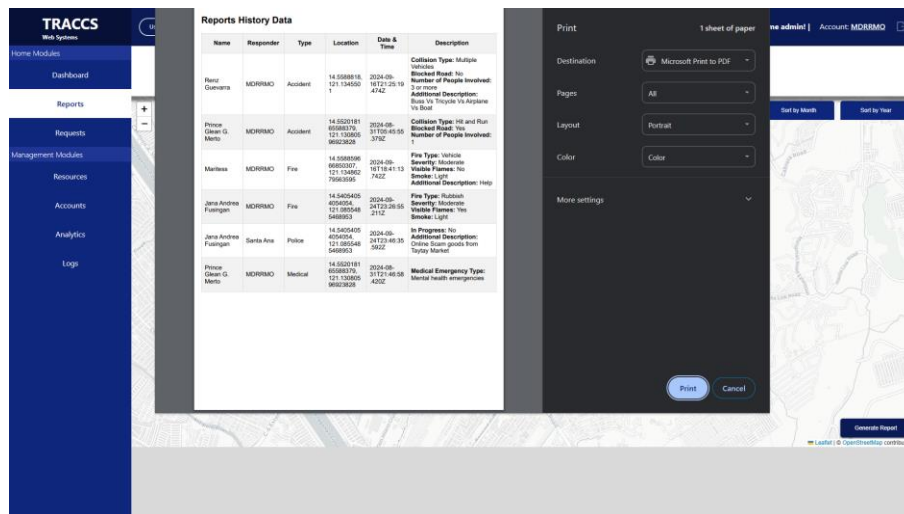

1. View the report's details by clicking the View Information button.
2. You can filter reports by choosing parameters such as “Sort by type,” “Sort by Month,” and Sort by “Year.”
3. You can add the report to the history map by clicking the “Add to history Map.”

4.1.7 History Map

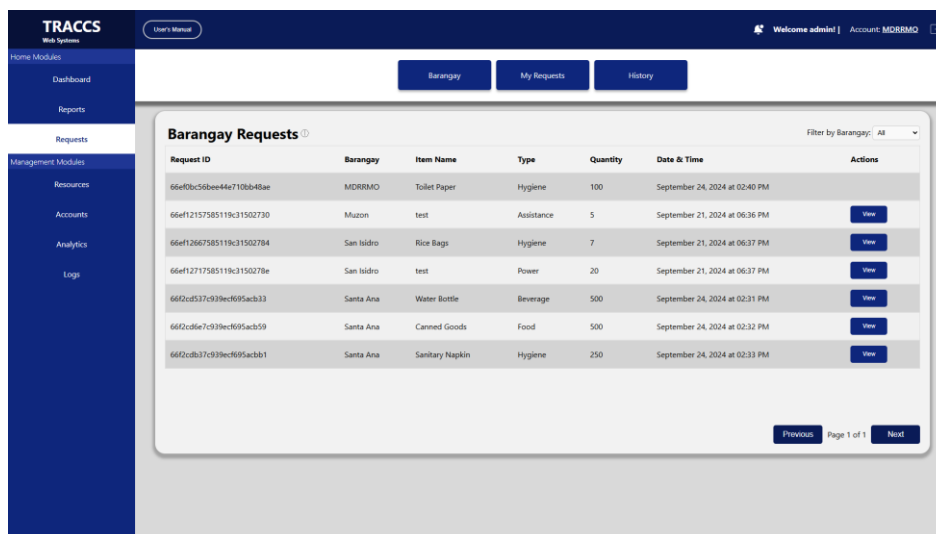

History Map – Here, you can view history reports chosen to be stored here.

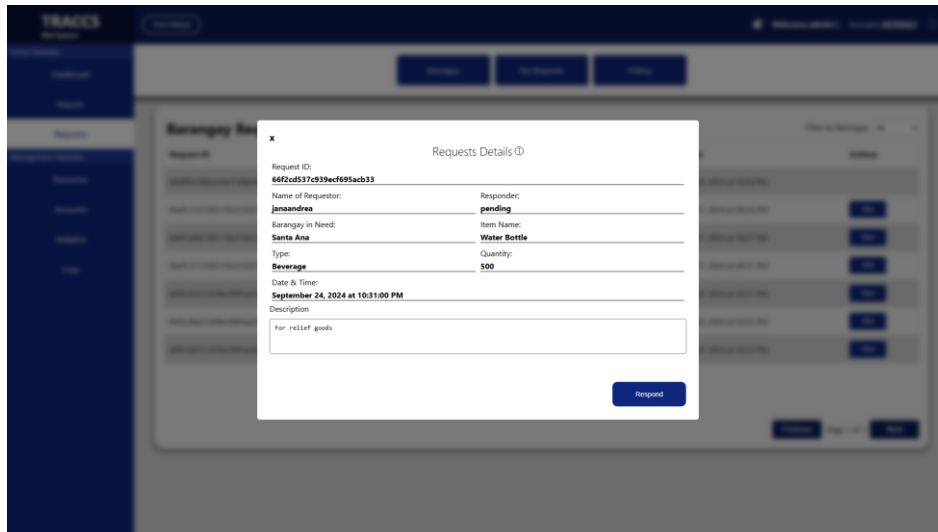

- You can click the icon to view details such as the reporter's name, the type of report, the status, the location, and the date and time.
- You can filter reports by choosing parameters such as “Sort by type,” “Sort by Month,” and Sort by “Year.”
- You can click the “Remove” button, and it will remove the report in the History Map
- If you click the “Generate Report” button located in the bottom right corner of the map, it will generate a PDF format of the filtered reports

4.1.8 Requests

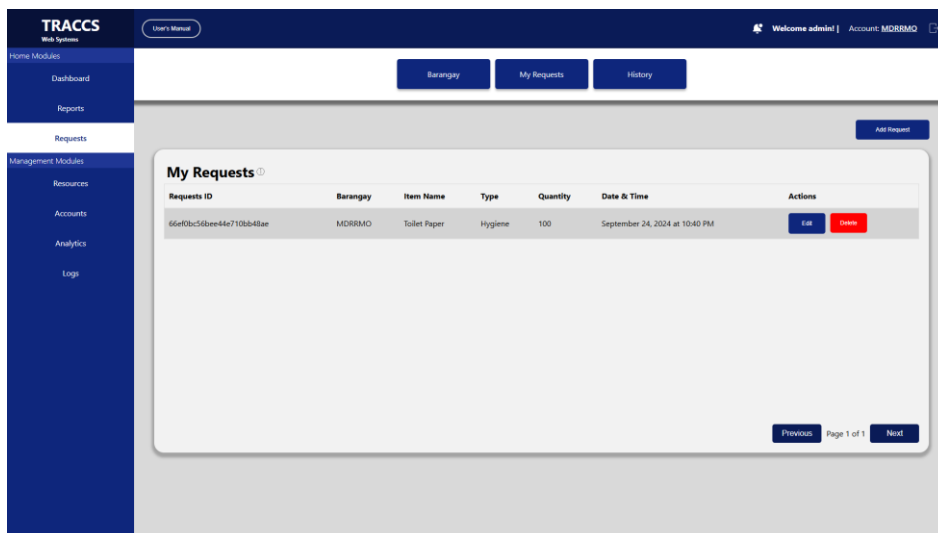

Requests – You will find submodules like “Barangay, My Requests, and History.”

Barangay Requests — On this page, you will see the lists of requests of different barangays within the municipality of Taytay. You can view and respond to the requests.

- A. Click the “View” button to see the request details.
- B. You can respond to the request by clicking the “Respond” button. And it will be stored in the history.
- C. You can also filter the requests by Barangay located in the upper right corner of the table

4.1.9 My Requests

My Requests – Here you will find your lists of requests. You can add, edit, and delete your requests.
